a. Nomenclature indicates the grain and spot, respectively, of the analyzed monazite. Sample name is indicated in bold. See Figure 3 for locations. See Table 2 for a summary of the age data.

b. Measured ratio in sample.

c. Measured ratio of the standard grains.

d. The % $^{208}\text{Pb}^*$ is the percent radiogenically derived ^{208}Pb .

e. Corrected sample ratio assuming $^{208}\text{Pb}/^{204}\text{Pb}=39.5\pm0.1$ [Stacey and Kramers, 1975].

f. Monazite inclusion in garnet.
