

# How to turn off DUO

1)  Acquisition

2) Select "COLUMNS" on CIPS main menu

3) Click "STOP SOURCE"

4) Click "DUO"

5) Click "APPLY"  
("STOP SOURCE NOW" is preselected)

6) When prompted "**WARNING: The log is going to be updated...**", click "OK"

7) Turn DUO gas off: Turn small knob on back side of DUO clockwise all the way

8) Press "VALID" on the Cameca keyboard (look in lower left corner): this disables the primary HV

9) *Only if O<sub>2</sub> flooding is enabled:* Turn O<sub>2</sub> leak valve 1.5 turns clockwise (OFF) to stop O<sub>2</sub> flooding.
